

F2159 PEX PLUMBING SYSTEM

Manufactured with cross-linked polyethylene, ONE PLUS Pex pipes boost more elaborate polyethylene performance without losing the excellent properties of thermoplastics. Our PEX pipes, with their excellent corrosion resistance and flexible toughness, can help you save time by allowing for the simplest piping installation.

ADVANTAGES

- Resistant to harmful chemicals and meets the CL5 classification
- for chlorine resistance
- Certified to NSF/ANSI 61 and NSF/ANSI 372 for safe distribution
- of potable water and free from lead Flexible and available in
- long coils that require fewer fittings than rigid tube
- Smooth inner wall ensures less pressure loss
- Light in weight, easy to carry and install
- Resistant to electrolyzation
- Resistant to chemicals
- Imperishable, rustproof, and resistant to calcification.
- Temperature resistant from -104 F to 203 F
- Lifespan of 50 years

Odorless on plumbing

CONNECTION

Crimp/Clamp connections

Used to connect ASTM F1807 brass fitting or ASTM F2159 plastic fitting with PEX tubing. It is one of the most commonly used connection methods in US market.

Press connections

Use special tools, physically press a connection onto the pipe to make an impermeable connection or seal with no O-ring design.
